ENGINEER OF HAWAII
VOL. 61 NO. 16 SERVING 2000 ENGINEERS OCTOBER 2026

POLICY CONSIDERATIONS TO MANAGE HAWAIʻI'S EV BATTERIES AT END-OF-LIFE: PLANNING FOR HAWAIʻI'S ELECTRIC VEHICLE GROWTH

Written By The Hawai'i State Energy Office

As of July 2026, over 40,000 electric vehicles (EVs) are registered in the state of Hawaiʻi, representing about 4% of Hawaiʻi's total registered passenger vehicles[1]. These vehicles contain large-format batteries that will require appropriate management at the end of their useful life.

State policy has encouraged EV adoption in Hawaiʻi through charging rebates, state fleet decarbonization requirements, and the new clean fuels standard.[2,3,4,5] However, Hawaiʻi lacks a comprehensive state policy framework that establishes who is responsible for managing EVs and their batteries at end of life or who must bear the associated costs. Without clear responsibility for collection, transportation, recycling, and disposal, these costs may ultimately fall on vehicle owners, businesses, or state and county agencies, creating financial and environmental risks as the number of EOL EV batteries increases.[6]

In 2025, the Legislature passed Act 209, which created an EV battery recycling and reuse working group with the Hawaiʻi State Energy Office (HSEO) co-chaired by the Department of Health. The legislation requires the group to: 1) develop best management practices for recycling, reuse and repurposing; 2) coordinate with other entities working on the same problem; and 3) recommend policy to the Legislature. The draft report is available on the HSEO website linked here. The groups guiding principles are safety, environmental health, and cost. EOL battery management is a process that entities are working to find solutions for globally.

NOT ALL BATTERIES ARE ALIKE: CHEMISTRY AND SIZE

"EV battery" covers a wide range of products, and that variety is one of the main reasons EOL management is a challenge. EVs in Hawaiʻi's use NiMH and several lithium-ion chemistries: lithium nickel manganese cobalt oxide (NMC), lithium nickel cobalt aluminum oxide (NCA), lithium iron phosphate (LFP), and lithium manganeseoxide (LMO). Manufacturers choose among them by weighing energy density, cycle life, cost, and safety.[7]

Chemistry can change even within a single make and model. First-generation Nissan LEAFs used LMO, while models from 2018 onward use NMC. Tesla's Model 3 and Model Y are the two most common EVs in the state; Tesla uses NMC in long-range versions and LFP in standard-range versions. Additionally, battery pack design is not standardized across the industry—two battery manufactures using the same chemistry may build different batteries.[8] Battery chemistry influences safety, handling and processing, and economics.

Battery chemistry also influences end of life management requirements and material recovery economics, and thus often determines whether recycling can be supported by market forces alone, which is currently not the case for all chemistries. A cobalt-rich NCA battery is worth more to a recycler than a low- or no-cobalt LFP battery, which returns much less under conventional recycling processes.[9] This affects how much value an automaker or recycler can recover when it accepts EOL management liability. The incurred or avoided costs from battery reuse, repurposing, recycling and disposal are ultimately passed on to customers, either as savings or added cost. Those economics can shift as commodity process and recycling technologies change. The working group stressed that a battery's current market value should not decide whether it is managed responsibly. Further, policy must be flexible and not solely driven by chemistry as chemistries are frequently evolving.

Act 209 focuses the working group on EV batteries, but lithium-ion batteries come in many formats. EV batteries are generally considered large format. Format and chemistry together determine how a battery is regulated. For example, federally large format batteries (~>300 Wh) require UN specification packaging, shipping documentation, and hazmat-trained handlers. Under Federal Universal Waste Rule, large-format lithium-ion and NiMH vehicle batteries cannot be landfilled and must go to a permitted destination facility.[10]

END-OF-LIFE OPTIONS

The working group is working to consider the full hierarchy of EOL options. Safety remains the top priority at every step.

Reuse: A battery that is still road-worthy and has met safety test requirements can be replaced in a vehicle other than the one it came from. This keeps its value in the transportation sector.

Repurposing: A battery can be modified for a different use, most commonly stationary energy storage. Doing so requires county electrical code compliance, IEEE 1547-2018 interconnection, utility requirements, and substantial testing and recertification.

Recycling: Multiple continental U.S. facilities have operational capacity to recycle all li-ion battery chemistries in all conditions.[11]

Disposal: Elements of every battery will eventually reach this stage; however, the hierarchy strives to minimize the amount of hazardous materials entering landfills. Importantly, processing is required to dispose of batteries as they are a significant fire hazard in landfills and other disposal facilities.

Managing end-of-life EV batteries in Hawaiʻi involves multiple layers of logistical (transportation), safety, regulatory, and infrastructure (processing facility) considerations and will require coordination among manufacturers, dealers, government agencies, transportation providers, recyclers and dismantlers, and other stakeholders. The Working Group is examining options across this management chain, including collection, transportation, processing, and other end of life options, as well as opportunities to develop in-state capacity and identify viable pathways for batteries that present additional transportation or safety challenges.

Emergency response measures, including approaches developed following the Maui wildfires, called the "Maui Method", provide an important option for addressing damaged batteries when immediate action is necessary.

DEADLINE FOR
WILIKI
IS OCTOBER 15TH

[Figure 1 "Maui Method" layout for the Ukumehame MM13.5 Wildfire Risk Reduction Project. Brining tanks are at the bottom of the photo, and the mechanical crushing area is on the left of the photo. Photo from Maui Emergency Management Agency.

CONT'D FROM PAGE 1, "POLICY CONSIDERATIONS TO MANAGER HAWAI'I'S EV BATTERIES AT END-OF-LIFE"

However, these measures were developed to address urgent situations and are not intended to substitute for a comprehensive, long-term statewide system for managing EV batteries at end of life. Establishing that system will require consideration of both immediate response capabilities and sustainable long-term solutions.

EXTEND PRODUCER RESPONSIBILITY MANAGEMENT POLICY

Extended producer responsibility (EPR) aims to provide a mechanism for management, liability, and cost recovery. Under EPR, producers fund end-of-life management and ensure all EV batteries even out-of-warranty and unwanted, have a framework for collection and management.

To date, three states have passed EPR laws specifically covering EV propulsion batteries. New Jersey requires producers to register and submit a battery management plan, either individually or through a producer responsibility organization. Producers bear all costs of collection, transportation, remanufacturing, reuse, recycling, and disposal. Propulsion batteries are banned from New Jersey landfills beginning January 8, 2027. Colorado passed its law in June 2026. Colorado law requires propulsion battery providers to register by July 1, 2027, and to fully fund the collection of unwanted batteries from secondary handlers such as dismantlers and scrap yards. Colorado policy also sets labeling and annual reporting requirements. California passed its law on September 20, 2026. California law requires permanent labels on new EV batteries and makes it state policy to prioritize reuse, repair, repurposing, and remanufacturing, then recycling, while discouraging disposal.

Hawai'i's bill aims to establish producer responsibility and funding requirements, provide funding for full time state positions for oversight, and establish labeling and reporting requirements for EV propulsion batteries, most similar to Colorado's bill. The draft EPR policy developed the working group is linked here.

YMF GENERAL MEETING

The next YMF general meeting will be in-person on Wednesday, October 7, 2026, at 6:00PM and Wednesday, November 4, 2026, at 6:00PM. Please check our website, social media channels, or weekly eblast for the latest information on our upcoming general meetings and events. If you are interested in attending and learning more about the various professional, social, and service opportunities available through YMF, please contact YMF at ymf.hawaii@gmail.com.

ASCE SPOTLIGHT: ENGINEERING IS A TEAM SPORT

Congratulations to our ASCE Hawai'i YMF Softball Manager and Captain, Matt, who was recently featured in an ASCE Civil Engineering Source article discussing how teamwork in sports translates to success in engineering. Be sure to check out the article!Please check out the link: https://www.asce.org/publications-and-news/civil-engineering-source/article/2026/07/28/like-sports-engineering-thrives-on-teamwork

AUGUST GENERAL MEETING

Thank you to everyone who came out to our August General Meeting at the Beretania Beer Lab! We had a huge turn out with 54 attendees. We appreciate your continued support. Hope to see you all at our next meeting

ASCE YOUNGER MEMBER LEADERSHIP SYMPOSIUM 2026 BY PATRICIA PAULINO, SECRETARY

This year's ASCE Younger Member Leadership Symposium (YMLS) took place on August 21-23, 2026 at the ASCE Headquarters in Reston, Virgina, with one representative from our YMF Executive Committee in attendance. The three-day experiential workshop brought together other fellow younger civil engineers from across the country for hands-on training in personal development and workplace leadership. It was also a unique opportunity to connect and network with other ASCE peers from throughout the country and internationally.

One of the biggest takeaways: soft skills are essential skills — they shape how you communicate and collaborate with others in the workplace, and are just as important as technical ability.

AYA GOLF SIMULATOR AND KARAOKE SOCIAL BY ZACHARY CHANG, GOLF ACTIVITIES CHAIRS

On Sunday, August 30th, YMF hosted a Golf and Social event at Aya Golf Lounge. Nineteen YMF members joined us for an evening of golf simulator fun, karaoke, and ono grinds. Mahalo to everyone who attended and helped make the event a success. Be sure to keep an eye on future YMF emails for details about the next YMF Golf Outing. We look forward to seeing you at the next one!

DAY AT THE BEACH WITH ACCESSURF BY MEAGAN NAKAMOTO AND KAY HASHIMOTO, COMMUNITY SERVICE CHAIRS

On Saturday, August 1st, seven YMF and student chapter members helped out at AccesSurf's Day at the Beach. We helped out with beach safety, helping participants move boards and kayaks in and out of the water. We were able to make water sports more accessible to those who might have thought it was not an activity they could participate in. Thank you to everyone who came out to help!

VICTAULIC'S 3RD ANNUAL ENGINEERS VS CONTRACTORS VOLLEYBALL TOURNAMENT BY JAREN IWASA, TREASURER

On Saturday, July 11th, eight players represented the ASCE Hawaii YMF team at Victaulic's 3rd Annual Engineers vs Contractors Volleyball Tournament! Our team won three of four pool-play matches before being eliminated in the first round of playoffs.

Congratulations to the University of Hawaii College of Engineering for going undefeated and winning the tournament for the second year in a row! A big mahalo to Victaulic for once again inviting us to participate in this fun and friendly competition.

OCTOBER GENERAL MEMBERSHIP MEETING - FUNDAMENTALS OF COLLABORATIVE DELIVERY: WHAT IS IT & HOW DOES IT APPLY TO ME?

Join us for a presentation by the Water Collaborative Delivery Association (WCDA) for a half-day session on the fundamentals of collaborative delivery, based on the Water and Wastewater Collaborative Delivery Handbook, Sixth Edition.

This meeting will provide a broad overview of collaborative delivery terminology and best practices for identifying, procuring, and delivering projects. The session is designed for those interested in learning the fundamentals and implementation of collaborative delivery.

Thanks to the generosity of WCDA and our sponsors, attendees will be provided with a copy of the Collaborative Delivery Handbook.

Register at this link by October 15, 2026

Event Details

Date: Friday, October 23, 2026

Location: Oahu Country Club, 150 Country Club Rd., Honolulu, HI 96817

Agenda

- 9:00 - 09:30 Check-in
- 9:30 - 10:00 Introductions
- 10:00- 11:00 Collaborative Project Delivery (CPD): Is it the right application for your project?
- 11:00 - 12:00 Making Sense of Collaborative Delivery Options: Construction Manager at Risk (CMAR), Progressive DB, and Fixed-Price DB
- 12:00 - 12:30 Lunch Provided
- 12:30 - 1:30 Understanding and Allocating Risks for Collaborative Delivery
- 1:30 - 2:00 Organization Readiness: What do you need to do to be ready for CPD?
- 2:00 - 2:30 Q&A

Cost

- ACECH Members: $100 per person
- Non-Members: $200 per person

REGISTRATION NOW OPEN FOR ACEC 2026 FALL CONFERENCE

ACECH members, mark your calendars! The 2026 ACEC Fall Conference is coming to Phoenix, Arizona, October 25–28. Connect with engineering professionals from across the country, gain fresh insights on the issues shaping our industry, and bring valuable ideas and connections back to Hawaii's engineering community.

Register now at https://www.acec.org/education-events/events/fall-conference/

VISIT ACEC HAWAII'S BOOTH AT PBX HAWAII ON OCTOBER 21, 2026 AT BLAISDELL CENTER!

ACECH will be at this year's PBX Hawaii as an Industry Partner!

Be sure to purchase your Early-Bird tickets at pbxhawaii.com and stop by the ACECH booth to talk story with some of our Board members. Learn more about what ACECH has been working on, what's ahead for the new term, and how we're continuing to support Hawaii's engineering community.

We look forward to seeing you at PBX Hawaii!

FRIDAY OCT 16 MEETING:

Speaker: Howard Lau PE – Structural Engineer Retired Coffman Engineering

Howard Lau was HSPE's Engineer of the Year for 2026 and he will visit with eaH and talk story about his 51-year structural engineering career. Howard retired from Coffman Engineering and previously was a principle at Shigemura, Lau, Sakanashi, Higuchi & Associates (SLSH). His projects were across Hawaii and spanned the Pacific Ocean. One of his leadership successes was mobilizing engineers to help Kauai after Hurricane Iniki, which allowed Kauai to rebuild stronger, safer and advocating for improved buildings and community education.

WEDNESDAY OCT 21 PBXHI 2026 CONFERENCE – NEAL S. BLAISDELL CENTER

eaH will again be an Exhibitor at PBXHi 2026. There will be 210 exhibitor booths and 12 expert-led seminars. PBX is Hawaii's premier trade show of the design and construction Industry. https://pbxhawaii.com/

ANNOUNCEMENTS

IEEE Hawaii Section Aloha Shirt Group Buy

The IEEE Hawaii Section is organizing a group buy for IEEE aloha shirts from Reyn Spooner. Pre-order your exclusive custom IEEE-branded aloha shirt today! Men's and Women's shirts available.

https://events.vtools.ieee.org/m/570356

The pre-order window will close on October 11th, 2026 at 11:55 PM HST. No shipping outside the US.

UPCOMING EVENTS

IEEE Hawaii October ExCom

Date: 06 Oct 2026

Time: 05:30 PM HST to 06:30 PM HST

Location: Webex

Event Link: https://events.vtools.ieee.org/m/562812

General Meeting/IEEE Day Celebration

Join the IEEE Hawaii Section in celebrating IEEE Day!

We are hosting an event at Dave & Buster's Ala Moana. Date and time is October 9th, 2026 from 5:30PM to 8:30PM.

Attendance is free, registration is required. Registration is capped at 54 attendees. Please only register if you plan to attend the event.

Food and beverage will be provided. For questions, please email Calvin Lee at calvinlee@ieee.org.

The event will open with a brief presentation about IEEE followed by time to socialize and mingle. Whether you are curious about opportunities to volunteer or are looking for a relaxing and fun time, please consider attending!

Date: 09 Oct 2026

Time: 05:30 PM HST to 08:30 PM HST

Location: Dave and Busters, Ala Moana Shopping Center, Honolulu, Hawaii, United States 96814

Event Link: https://events.vtools.ieee.org/m/571600

IEEE Hawaii YP October ExCom

Date: 14 Oct 2026

Time: 05:30 PM HST to 06:30 PM HST

Location: MS Teams

Joint Pau Hana

Our recent Joint Industry Pau Hana was a huge success! Over 75 professionals gathered at Pitch Sports Bar in Kaka'ako on August 13 for a fun evening of networking and interdisciplinary coordination. Hosted by the Institute of Electrical and Electronics Engineers Industry Applications Society (IEEE IAS), ASCE YMF, HWEA/AWWA YP, and ASHRAE YEA, the event provided a fantastic opportunity for members and friends to connect, share ideas, and build valuable relationships within the local engineering community. Thank you to all who attended and made it such a great time. We look forward to seeing you next year!

Financial Literacy Seminar

IEEE YP Hawaii Hosts Successful Financial Literacy Seminar

On Wednesday, August 26th, the IEEE Hawaii Young Professionals (YP) hosted an insightful Financial Literacy Seminar at The Pacific Club. The event provided a fantastic opportunity for engineering professionals to learn about securing their financial futures.

The seminar covered essential topics such as 401(k) Enrollment & Contribution Planning and developing a robust Retirement Savings & Investment Strategy. The session was highly informative, offering clear and practical advice to help young professionals confidently manage their retirement goals.

Attendees enjoyed networking with peers over heavy pupus in a relaxed and professional setting. Huge kudos to our event sponsors: IEEE Hawaii YP, IEEE Hawaii Section, and WestPac Wealth Partners Hawaii!

A special thank you to Roxy Kiessling of WestPac Wealth Partners for sharing her valuable knowledge and insights, and to everyone who attended and contributed to the event's success. Keep an eye out for future events!

IEEE Hawai'i WIE Financial Literacy Workshop with WestPac

On Wednesday, September 9, IEEE Hawai'i Women in Engineering (WIE), in collaboration with WestPac Wealth Partners, hosted Engineering Your Financial Success, an insightful financial literacy seminar held at The Pacific Club.

The event brought together students and engineering professionals to learn more about saving, financial planning, retirement planning, and making informed financial decisions for the future. Throughout the evening, attendees gained practical and valuable insights to help them better understand their finances and confidently work toward their short- and long-term financial goals. In addition to the seminar, attendees had the opportunity to connect and network with fellow students and professionals while enjoying heavy pūpū in a relaxed and welcoming setting.

A huge thank you to our event sponsors, IEEE Hawai'i Section and WestPac Wealth Partners Hawai'i, for their generous support in making this event possible! We would also like to extend a special thank you to Roxy Kiessling for helping make this event possible, and to everyone who joined us for the evening.

Thank you to everyone who contributed to making Engineering Your Financial Success a successful and memorable event!

IEEE JOB LISTINGS

The following jobs are currently listed on the IEEE Job Board.

- Electrical Engineer - Naval Facilities Engineering Systems Command (NAVFAC)
- Project Engineer - PAC Electric Co., Inc.

Want to post a job? r6.ieee.org/hawaii/post-a-job

UPCOMING CONFERENCES

- 2026 Annual Conference on Magnetism and Magnetic Materials (MMM). 2 - 6 November 2026 | Hawaii, USA | Event Format: In-person
- 2026 International Conference on Field Programmable Technology (ICFPT). 7 - 10 December 2026 | Hawaii, USA | Event Format: In-person
- 2026 65th IEEE Conference on Decision and Control (CDC). 15 - 18 December 2026 | Hawaii, USA | Event Format: In-person
- 2027 IEEE 40th International Conference on Micro Electro Mechanical Systems (MEMS). 17 - 21 January 2027 | Hawaii, USA | Event Format: In-person
- 2027 Pan Pacific Strategic Electronics Symposium (Pan Pacific). 25 - 28 January 2027 | Hawaii, USA | Event Format: In-person
- 2027 International Conference on Computing, Networking and Communications (ICNC). 15 - 18 February 2027 | Hawaii, USA | Event Format: In-person
- IEEE INFOCOM 2027 – IEEE Conference on Computer Communications. 24 - 27 May 2027 | Hawaii, USA | Event Format: In-person

As a member of the Board of the Council of Engineering and Scientific Specialty Boards (CESB), AACE International offers a range of certification levels from technician to professional to expertise level including CCT, CCP, CEP, EVP and PSP Certification Programs.

The local section, AACE Hawaii, was originally established in 1973. It achieved both the Platinum and Gold Award for seven consecutive years 2014-2023. Our local area continues to achieve CCP, CEP, CST and PSP certifications. For more information, please visit *http://web.aacei.org/certification* and our local website *www.aacehawaii.com*.
